

Project Design Phase-II
Solution Requirements (Functional & Non-functional)

Date	31 January 2025
Team ID	
Project Name	Comprehensive Analysis and Dietary Strategies with Tableau: A College Food Choices Case Study
Maximum Marks	4 Marks

Functional Requirements:

FR No.	Functional Requirement (Epic)	Sub Requirement (Story / Sub-Task)
FR-1	Data Import	Upload food survey dataset (CSV) Validate dataset structure
FR-2	Data Cleaning	Handle missing values Standardize categorical data Format GPA and numeric fields
FR-3	Data Analysis	Analyze dietary habits Analyze academic performance Identify eating patterns
FR-4	Interactive Dashboard	Display charts, KPIs, filters, and drill-down analysis
FR-5	Visualization	Breakfast habits Fast food consumption Comfort food reasons Fruit & vegetable intake
FR-6	Filtering & Exploration	Filter by gender, GPA, exercise, dietary habits
FR-7	Report Generation	Export dashboards as PDF/Image Share Tableau workbook
FR-8	Decision Support	Provide insights for students and cafeteria management

Non-functional Requirements:

NFR No.	Non-Functional Requirement	Description
NFR-1	Usability	Simple, interactive and user-friendly Tableau dashboards.
NFR-2	Security	Protect dataset and restrict unauthorized access.
NFR-3	Reliability	Provide accurate and consistent analytical results.
NFR-4	Performance	Load dashboards and filters with minimal delay.
NFR-5	Availability	Accessible whenever the Tableau workbook/server is available.
NFR-6	Scalability	Support larger datasets and additional visualizations in the future.
