Date	15 February 2025
Team ID	
Project Name	Comprehensive Analysis and Dietary Strategies with Tableau: A College Food Choices Case Study
Maximum Marks	2 Marks

Proposed Solution :

S.No.	Parameter	Description
1	Problem Statement (Problem to be Solved)	College students often adopt unhealthy dietary habits such as skipping breakfast, consuming excessive fast food, irregular meal patterns, and stress-induced eating. These behaviors can negatively impact health, concentration, and academic performance. There is a need for an interactive analytical solution to identify these patterns and support informed decision-making.
2	Idea / Solution Description	Develop an interactive Tableau dashboard that analyzes student food choice survey data to visualize dietary habits, lifestyle factors, and academic performance. The solution enables users to explore trends through dynamic charts, filters, and KPIs.
3	Novelty / Uniqueness	Integrates nutrition, lifestyle, and academic data into a single visual analytics platform, enabling stakeholders to identify meaningful relationships and make evidence-based decisions.
4	Social Impact / Customer Satisfaction	Promotes healthier eating habits, increases nutrition awareness, supports student wellness programs, and helps institutions improve cafeteria

		services and student satisfaction.
5	Business Model (Revenue Model)	Can be licensed to educational institutions, universities, wellness centers, and research organizations. Additional revenue can be generated through dashboard customization, consulting, and training services.
